

"Fossils Rock!"

1-4pm, March 25, 2006

 The Nature Center

 Clifty Falls State Park 

Fossils rock! A journey in earth history for an afternoon of geology made fun! Great for kids and families!

1pm "Fascination With Fossils" Our afternoon begins indoors with fossils in hand getting to know Indiana's most common fossil types, how nature produces fossils, and the importance of the fossil record. 

2pm "Fossils In The Field" Flex what we've just learned by exploring one of the finest fossil exposures in Indiana right here in Clifty Falls State Park... and it's all a fifteen minute hike from the Nature Center. Dress appropriately for field hiking. 

3pm "Fossil Collecting!" Cap the afternoon by carpooling to a location near the town of Madison where you'll be able to collect a variety of Ordovician fossils.

- Program fee \$2/person age 5 and up.
Limited to the first eighteen to register by calling the Nature Center at 812-273-0609.
Children 13 & under must be accompanied by an adult.
